

Super Vector Mario Report

Alice Cooper and Bob Marley

February 15, 2018

Results

Our implementation passed all tests on codeJudge at time [14-02-2018 13:46]. Here are the paths lengths discovered by our algorithm:¹

Instance	Lenght	Comment
example	10	
L	21	
donut	42	
donut2	36	Seems to be wrong
eighty	–	Ran out of time
[...]		

¹ Complete the report by filling in your correct names, filling in the parts marked [...], and changing other parts wherever necessary. For instance, if your implementation passes all tests, then write that. Remove the sidenotes in your final hand-in.

Implementation details

We solve the problem by running Prim's algorithm² on the following graph: Every vertex is a [...].

To construct the graph, we [...]³

Our total running time is [...] inputs with r rows and c columns.

² replace by correct algorithm

³ Explain what you do. Three sentences are a lot.
